

Environmental Policy

The Directors of W McClure's Limited (The Company being W McClure Ltd) recognise that The Company has a responsibility to the environment, customers, suppliers and staff to base its commercial activities using ethical, sustainable and economic good practice.

The Company is committed to reducing waste wherever possible. It will separate where possible all cardboard, glass and plastics and re-cycle them either through suppliers or using registered carriers of recyclable / waste products.

The Company, where possible, will compact waste products before collection. In particular, all cardboard will be compressed and bundled.

The Company commits itself, where commercially available, to offer a free waste collection service for used cooking oils. The company will therefore act as an intermediary for a partnership company who will re-cycle waste cooking oil where it will be converted into 'bio-diesel' or other sustainable products.

The Company will always aim to reduce the carbon footprint of company vehicles. Commercial vehicles are fitted with a 'Fuel Conditioner' for optimum fuel and emission savings. In addition company vehicles are fitted with a 'real-time' tracker facility to allow accurate monitoring of, and to economically optimise, driver routes. We will encourage a reduction in face to face meeting using technology in an effort to reduce the use of fuels.

The Company, wherever possible, will work closely with, and will purchase from, local suppliers of fruit, meat, milk and vegetables, and work with all suppliers to minimize environmental impact and to achieve environmental sustainability.

The Company commits itself to ensuring that all fish products are compliant with the Marine Stewardship Council fishery certification program and we will seek to ensure supplier compliance.

The Company will work closely with all suppliers of 'meat products' to ensure the genuine authenticity of meat(s) contained within those products.

The Company commits itself to comply with all relevant environmental legislation in UK law and will endeavor to protect the environment and minimize environmental impact wherever, and whenever, we have influence using all engaged stakeholders.

Mr K McClure
